

CRITICAL THINKING

Fostering Skills in a
Virtual Space

November 6, 2025

Introduction

Hi there! I'm Nikki!

I've lived in

- North Carolina, Nevada, and Illinois in the United States
- Japan, China, and currently Hanoi, Vietnam
- Teaching since 2007
- Educational Consultant, Career Counselor, and Academic Coach

CPD FRAMEWORK

Figure 1: The framework

Using 21st century skills / core skills

This professional practice is about the skills that learners and teachers need in order to develop agency, navigate a fast-changing and connected world and to participate actively and critically in learning and in life.

Using 21st century skills / core skills

Developing my own awareness of and proficiency in:

Learning skills

- critical thinking and problem-solving
- communication
- collaboration and interpersonal skills
- creativity and innovation
- learning to learn and metacognition.

Life skills

- active citizenship around social, political, environmental or economic issues and responsibilities
- cultural awareness
- intercultural competence
- developing and building on student agency, autonomy and leadership
- developing life-long learning skills to support employability.

Literacy skills

- digital literacy and critical digital literacy (including information literacy)
- emotional literacy (e.g. self-awareness, maintaining well-being, resilience and motivation)
- media literacy (e.g. receiving information, understanding and summarising it and then communicating it to others).

Selecting appropriate methodologies, activities and resources for introducing, developing and evaluating my learners' skills in these areas.

Demonstrating the value and importance of 21st century skills / core skills for my learners (e.g. modelling my own development of literacy skills as part of my life-long learning).

Reflecting on my strengths and weaknesses in relation to my own proficiency in 21st century skills / core skills and my ability to develop my learners' proficiency in these areas.

Your participation matters!

On your phone or tablet, go to
classpoint.app

Enter the code at the top of the
screen.

This will allow you to participate in
various activities as we go and to
see the slides.

CORE SKILLS IN 2025

What do you think are the top three skills employers desire, according to a 2025 World Economics Forum report?

Word Cloud

Word Cloud submissions

flexibility, adaptability
life-long learner
soft skills

CORE SKILLS IN 2025

<https://www.weforum.org/publications/the-future-of-jobs-report-2025/in-full/3-skills-outlook/>

World Economic Forum 2025 Report:

1. Analytical thinking
2. Resilience, flexibility, agility
3. Leadership and social influence
4. Creative thinking
5. Motivation/self-awareness

Analytical thinking: understanding and dissecting information (involves logical reasoning, deductive and inductive reasoning, and problem-solving techniques)

Critical thinking: evaluating and judging it (involves skepticism, inquiry, and reflection)

WHY FOCUS ON CRITICAL THINKING?

Capital Scholars Honors Program, Springfield, Illinois

Who Am I? (Identity)

How Do You Know? (Epistemology)

What is Good? (Morals and Ethics)

What is Power? (Control, Cooperation, and Self-Determination)

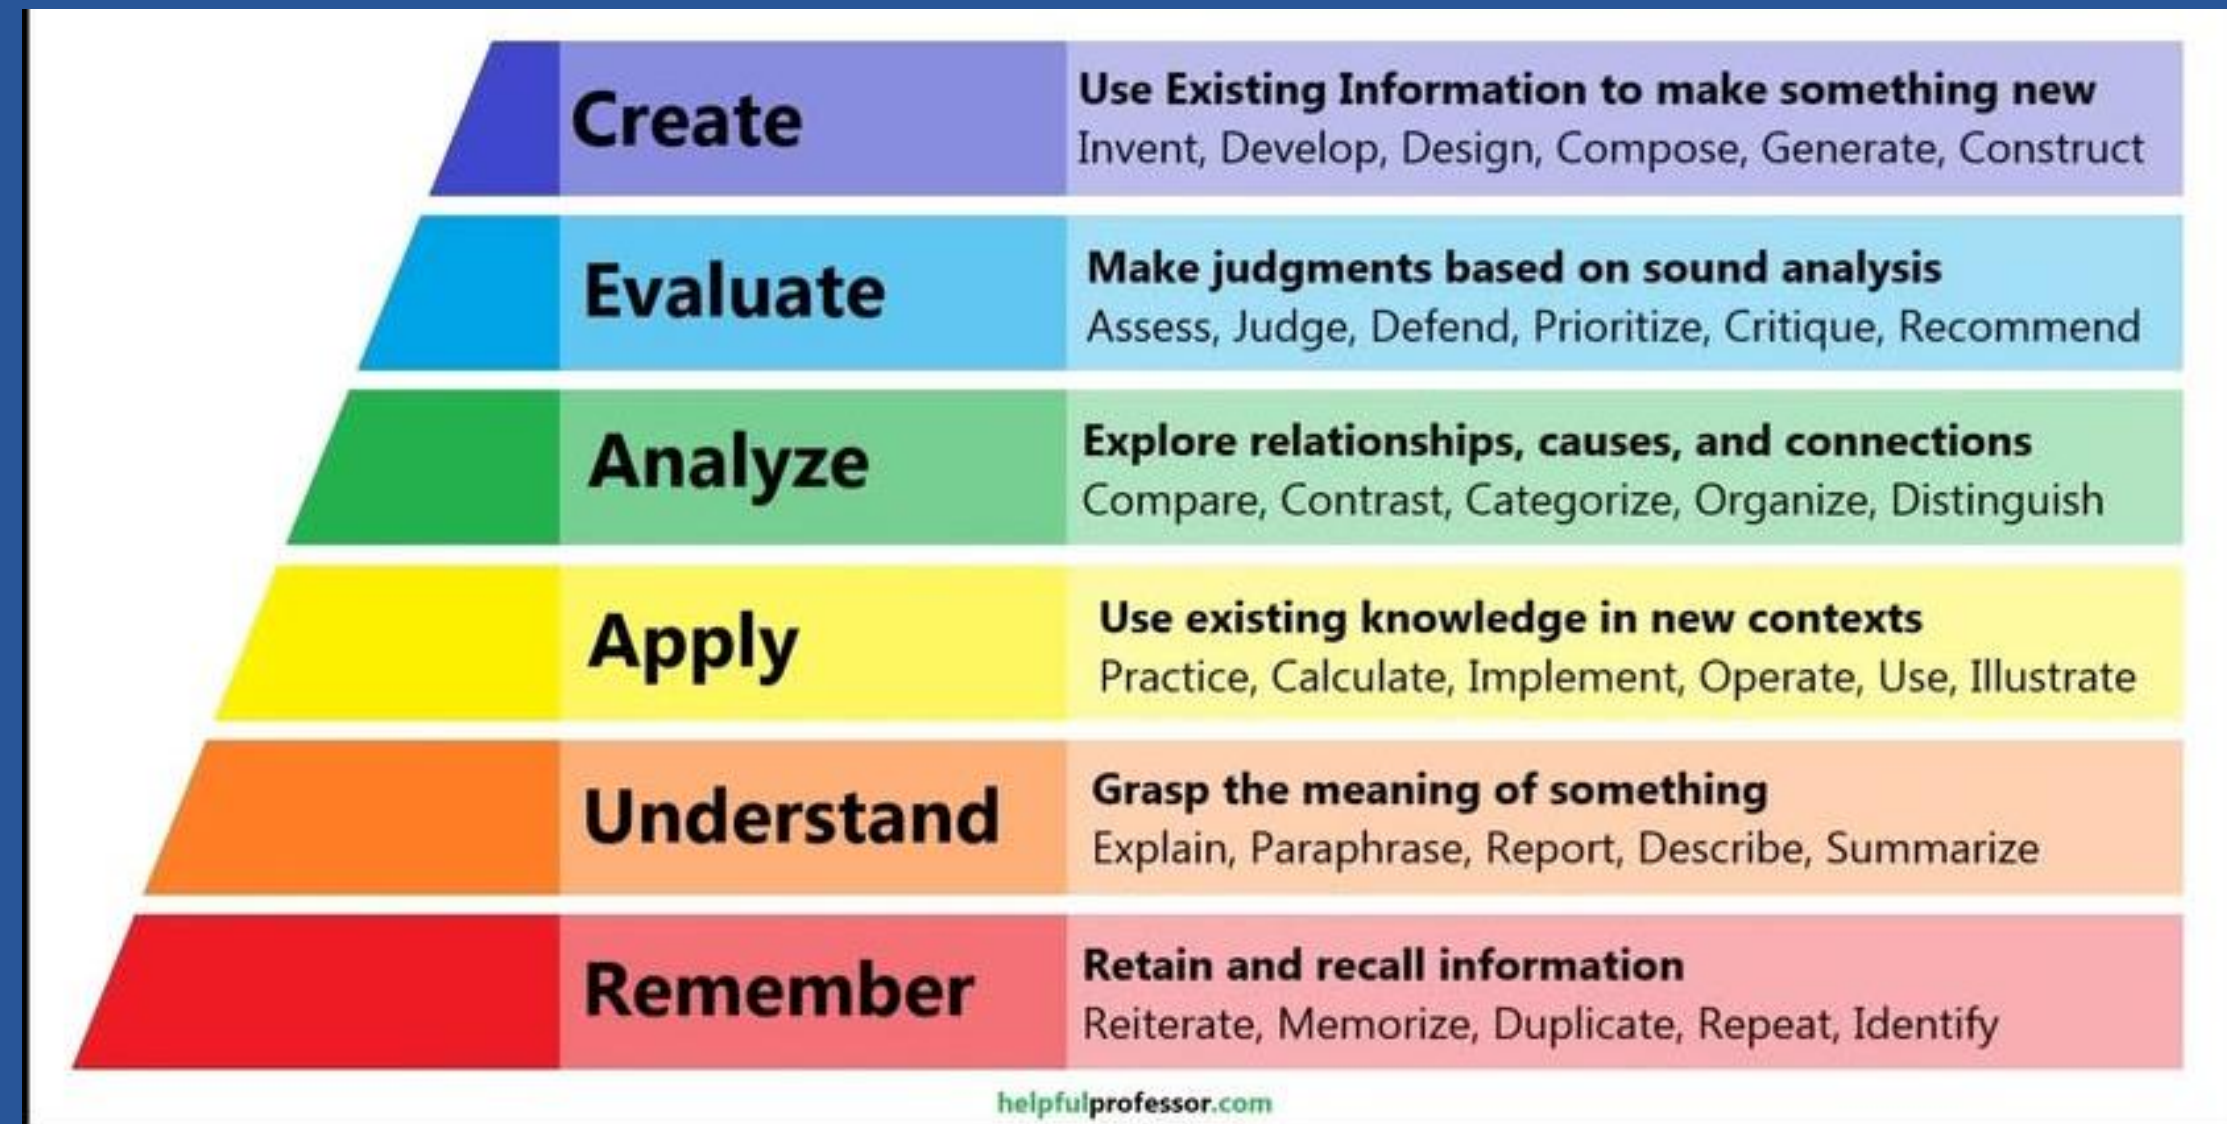

BLOOM'S TAXONOMY

Are you familiar with this
framework?

1. Yes
2. No

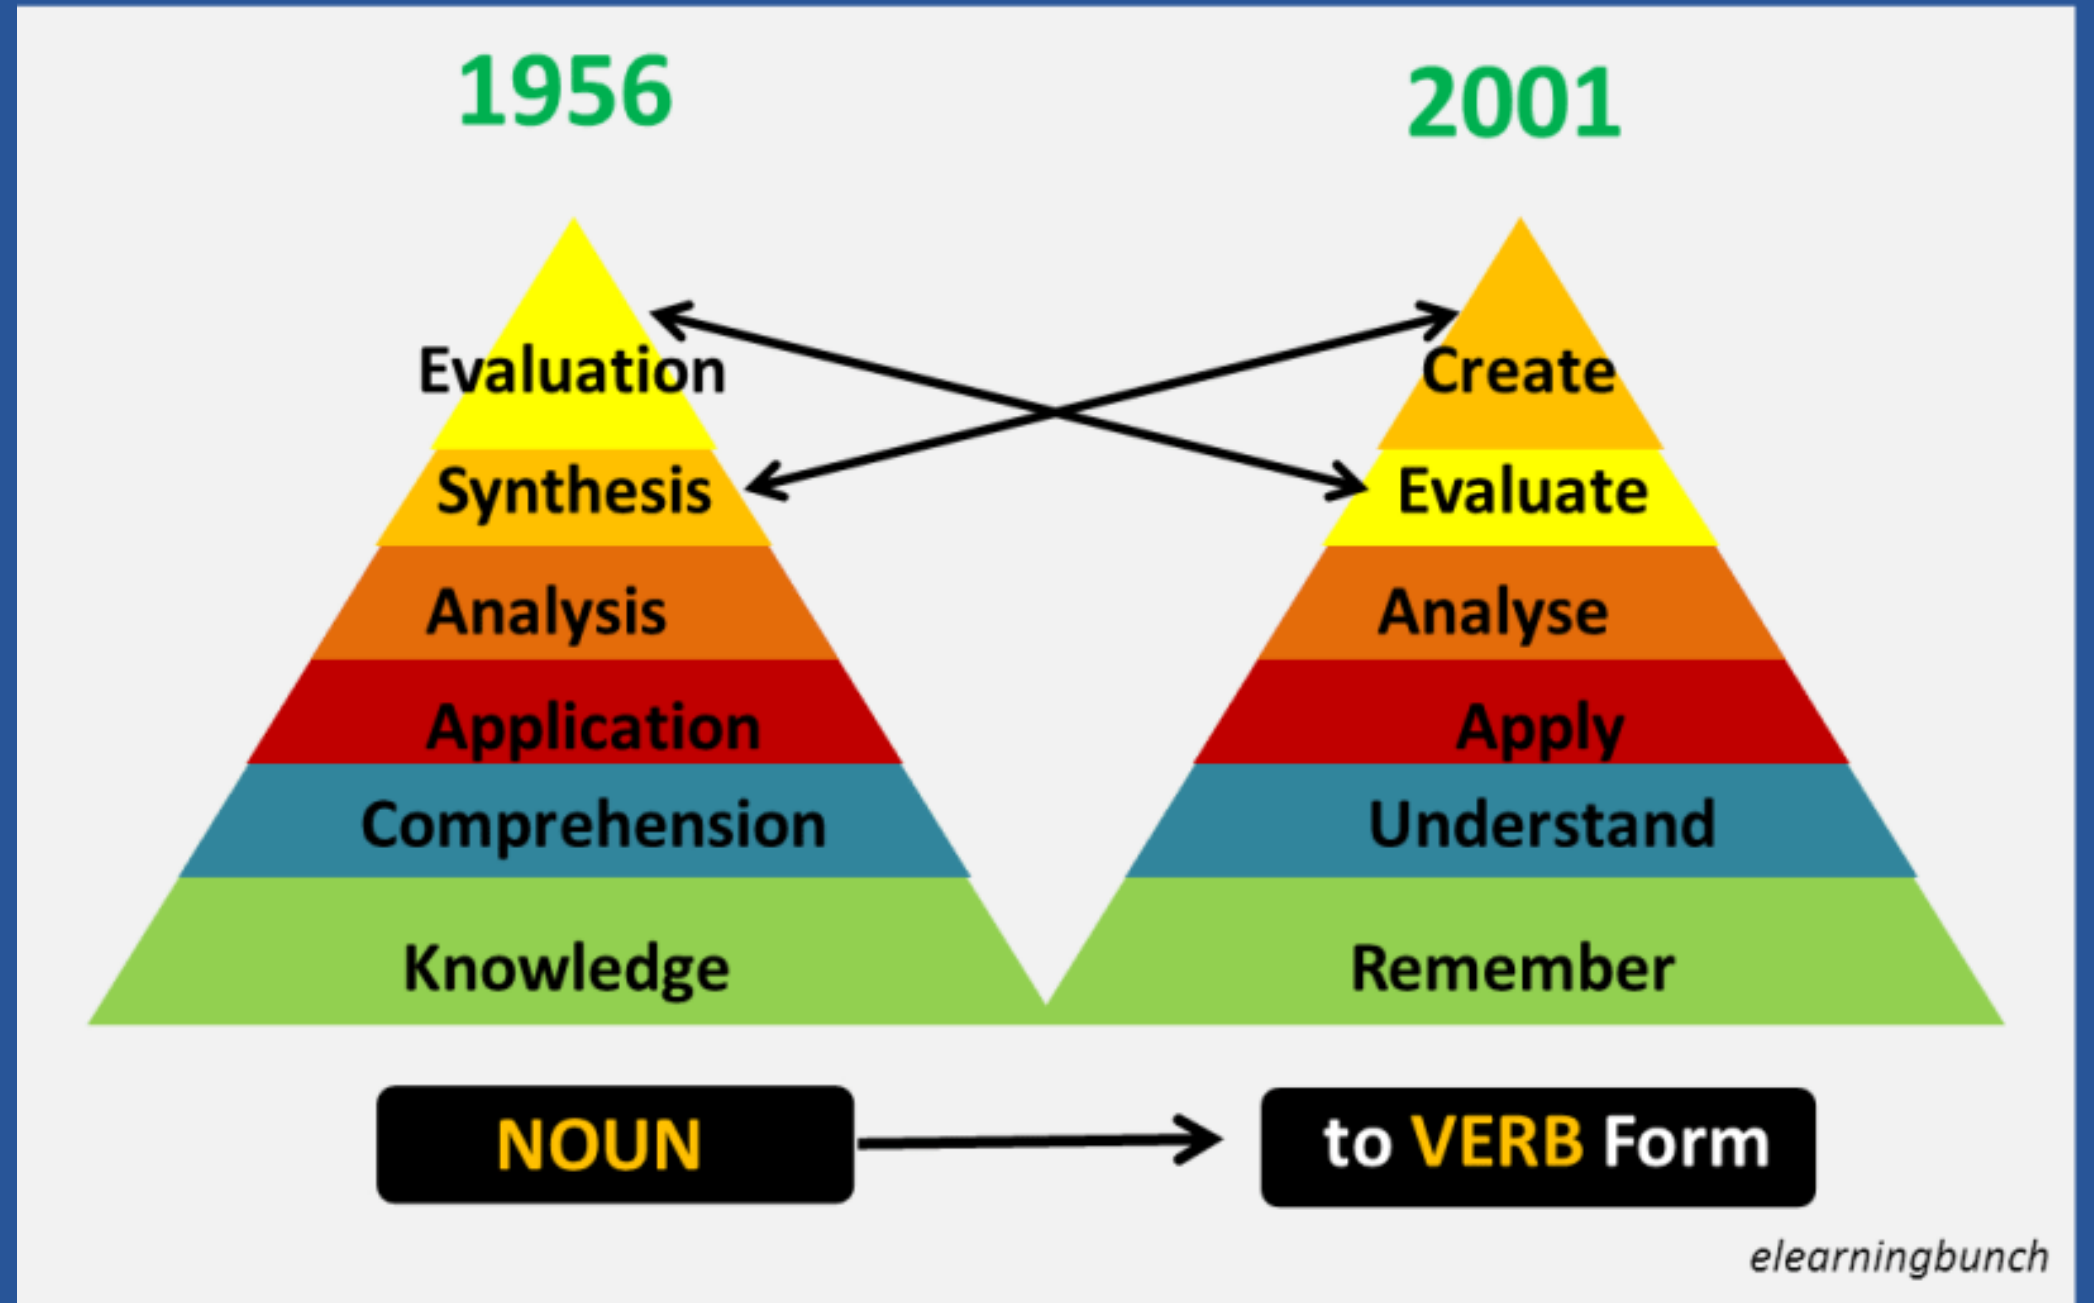

What changes were made in
2001 to the original 1956
version of the framework?

Multiple Choice

BLOOM'S TAXONOMY

Creates a scaffold for designing tasks that progress from lower-order to higher-order thinking

Initial Engagement

Devote time to explaining BOTH the tool and the reasoning.

Doing so shows students how to analyze information, understand the "why" behind concepts/approaches, and engage in logical thought.

01

AI BENEFITS AND CHALLENGES

Key question: What benefits and challenges do you see emerging from the increased usage of AI amongst your students?

In your breakout group, make a list of up to nine ideas.

You will have seven minutes. Please briefly introduce yourself first.

Be prepared to add your items to the sticky notes and to discuss them upon your return to the main room!

STRATEGIES

- Open-ended questioning (why, how, what if)
- Socratic questioning
- Metacognition (prediction, reflection, peer feedback)
- Project-based learning (PBL)
- Mind-mapping
- Case studies

STRATEGIES

- Open-ended questioning (why, how, what if)
- Give a clear time limit for preparing answers and then have a “Ready, Set, Post” moment
 - In-person students have time to think. This can feel awkward online if timing isn’t clear.
 - Promotes divergent thinking as students haven’t seen each other’s answers
- Practice:
 - Post an open-ended question related to the topic of critical thinking.
 - You have two minutes to prepare. Do NOT post until I say “Post!”

STRATEGIES

- Socratic method: encourage students to analyze and think deeply rather than just memorize information
- Grammar:
Why do you think the author chose to use past tense here?
- Vocab
What do you think the word “home” implies that the word “house” does not?
- Clarification of meaning
Can you give me an example of what you mean?

YOUR TRIUMPHS AND CHALLENGES

What challenges have you faced in trying to develop critical thinking amongst your students?

Short Answer

02

TIPS AND SUGGESTIONS

Model thinking for students

Provide varied perspectives via authentic materials

Promote safe environment for exploration of thoughts
(i.e. spaces where there is no “right” answer)

Integrate reflection often
